Professional Summary

MERN Stack Web Developer specializing in building modern, responsive, and user-friendly web applications. Turn ideas into functional digital solutions using MongoDB, Express, React, and Node.js, with clean, efficient code and attention to detail. Passionate about creating seamless user experiences and scalable applications that make an impact.

Education

09/2019 – 07/2023

- **Zagazig University**, Faculty of Computers and Informatics – Data analysis Department
 - **Degree:** Bachelor of Computers and Informatics
-

Experience

Simple Way (Front-end Developer)

04/2026 –Now

- Contributed to a live enterprise GRC platform, building dashboards, workflows, and role-based UI with secure data access. [Live](#)
- Experienced in building dynamic and responsive interfaces, handling API integrations, optimizing performance, implementing reusable components, and collaborating within agile development teams using React.js, JavaScript, Tailwind CSS, Redux, and modern frontend practices.
- Developed scalable React components and integrated backend APIs for core business features with focus on performance and maintainability.
- Implemented secure frontend practices including role-based rendering and protected routes in a sensitive enterprise environment.

Next Group (Software Developer)

02/2024 –10/2024

- Developed React.js training simulators, boosting learning efficiency by 60% and cutting training time by 50%, with experience in Electron.js, Node.js, MongoDB, and C++.
 - Worked as a Frontend Developer responsible for building and maintaining user-friendly and responsive web applications.
 - Designed and delivered interactive UIs with 100% responsiveness across devices and improved user satisfaction scores by 50%
 - Optimized system performance and reduced UI load time by 35% through code refactoring and modular component architecture.
-

Projects

Civilization Spirit App (graduation project with grade : A+) : ([GitHub](#) | [Demo](#))

- A tourism web application showcasing Egyptian historical, cultural, and rare sites with categorized exploration, dynamic data integration, secure user authentication, booking simulation, and contact system functionality with React (Vite), React Router, Firebase Authentication (Email & Google), REST API integration (Wikipedia API), EmailJS, and responsive CSS.

MyMovie App: ([GitHub](#) | [Demo](#))

- Developed **MyMovie App** Movie & TV Shows Web App, a responsive React & Vite frontend integrating TMDB API for real-time movie, TV show, and actor data, with Tailwind CSS, Zustand, React Router, and Chart.js for dynamic dashboards and interactive UI.

Task Manager: ([GitHub](#) | [Demo](#))

- Developed a responsive **task management** application using React.js, enabling users to create, update, organize, and track tasks efficiently. Implemented reusable components, state management, and form validation to enhance user experience. Integrated RESTful APIs for seamless data handling and real-time updates. Focused on clean UI design, performance optimization, and responsive layouts across different devices.

Fast Pizza App: ([GitHub](#) | [Demo](#))

- **Fast Pizza** — a React + Vite + Tailwind web app with Redux Toolkit for state management, featuring dynamic menu browsing, cart operations, order management, and geolocation-based address resolution via public APIs.

E-commerce App: ([GitHub](#) | [Demo](#))

- Developed a responsive **e-commerce** platform for mobile phones and accessories using React.js, enabling users to browse products, view detailed specifications, and manage their shopping cart. Integrated RESTful APIs for product management, search, and filtering functionalities. Designed a user-friendly and mobile-responsive interface to provide a seamless shopping experience across devices.

Ricepe-food Application: ([GitHub](#) | [Demo](#))

- React Full **Recipe App**. This app allows you to discover a wide range of delicious recipes, including popular items, veggie picks, and various cuisine categories such as Italian, Chinese, Thai, and American. You can also use the search feature to find your favorite recipes quickly.

Weather App: ([GitHub](#) | [Demo](#))

- A simple and modern **Weather App** that allows users to check real-time weather information for any city around the world. The app provides temperature, humidity, wind speed, and weather conditions using a clean and responsive UI.

Technical Skills

- **Front-end:** React.js (Hooks, Context API, Performance Optimization), HTML5, CSS3, Flexbox, Grid, Tailwind CSS, Styled Components, MUI, Redux, Zustand, React Query, Axios, Supabase, Electron.js, WebSocket.
- **Back-end:** Node.js, Express.js, MongoDB, MySQL, RESTful APIs, JWT Authentication, Stripe Integration, WebSocket (server-side).
- **Programming & Software Engineering:** JavaScript (ES6+), TypeScript, C++, OOP, SOLID Principles, Design Patterns, Authentication & Security, JWT, CSRF, API Integration, Software Architecture.

Certifications

Certificate of Full Stack Web Development Diploma (**Route Academy**) . 08/2022 – 05/2023

Languages

- Arabic (Native)
- English (Advanced)
- Germany (Intermediate)

Soft Skills:

- Collaboration
 - Leadership.
 - Decision Making
- Continuous learning.
 - Problem-solving.
 - Critical Thinking
- Communication Skills
 - Attention to Detail
 - Analytical Thinking
